

Planning for the adoption of ecodesign implementing measures *

14 product groups + standby currently examined for potential implementing measures:

* Assumption: Committee and EP are immediately in favour of the draft

** Could take from 4 to 12 months depending in particular on discussions on reinforced scrutiny by EP - includes WTO notification and translations

Last update: 17/10/2007

In 2007, 5 additional preparatory studies will be launched for the following products: solid fuel small combustion installations (in particular for heating), laundry dryers, vacuum cleaners, simple and complex TV set top boxes for digital signal reception

The contract for the domestic lighting study (covering also incandescent bulbs) was signed in June 2007, leading to an adoption by the Commission in 2009 as requested by the European Council of 8-9 March 2007.
